THE HOUSTON CODING BOOT CAMP /// 2017
Certificate in Full Stack Web Development from The University of Texas at Austin

SAN JACINTO COLLEGE /// 2010 -> 2011
Certificate in Web and Graphic Design

MTI COLLEGE OF TECHNOLOGY /// 2002 -> 2004
Associates Degree in Computer Systems Technology

PROJECTS

BRAVOO BRAVOO.HEROKUAPP.COM
A student assignment tracking application with incentives. The application is designed for students to track their class assignments. The parent receives notifications once the assignment is complete. There is a status bar that the parent can adjust, and once the bar is full the student is rewarded with the incentive of the parents choice. Languages and libraries used: HTML, CSS, Foundation, Handlebars, Javascript, JQuery, Node.js, Express.js, MySql, Sequelize, Passport. My responsibilities for this project was in setting up the Node server, the MySql server, configuring the communication between the technologies and the setup of user authentication with Passport.

CAKE APP REACT-CAKE-APP.HEROKUAPP.COM
This application was designed to generate an instant quote for custom cakes. A potential client can select from listed options. The application takes these variables then generates a quote. The client can then place the order. Languages and Libraries used: React, HTML, CSS, Bootstrap, Handlebars Javascript, JQuery, Node.js, Express.js, MONGODB, Mongoose, Passport. My contributions for this project included setting up the Node server and Mongo database and connecting the technologies together. Design of the quote generating options as well as the function of the quote generator in Bootstrap, Handlebars, and Javascript.

MOPED BUILDER SQLIZEMOPED.HEROKUAPP.COM
This is a fun application for a visitor to add moped parts to a database and then install those parts on their moped. The site was created to be used as a tool to track moped parts that I was using on a build. This is a CRUD application developed with Node.js, Express.js, HTML, CSS, Handlebars, Javascript MySql and Sequelize.

EXPERIENCE

PRINT PRODUCTION SUPERVISOR /// Alliantgroup 2013 -> NOW
Manage a team for an in-house print shop equipped with two digital presses, a perfect binder and a hydraulic paper cutter. Instrumental in the planning and implementation of technology and process for the print shop.

JUNIOR GRAPHIC DESIGNER /// Stinger Chemical 2010 -> 2012
Collaborated with the lead graphic designer on the new company website and packaging design of products for the company and clients. Worked with a small team to design trade show booths, marketing materials, and signs.
